Energy Efficiency and Renewable Energy

The Twin Pillars of a Sustainable Energy Strategy

The Ottawa Renewable Energy Co-operative has been in the business of producing renewable energy for many years, and has had great success in the sector. There is no intention of changing this, but we have always been seeking ways to support energy efficiency alongside the production of renewable energy.

Members of the Ottawa Renewable Energy Co-operative, alongside staff and board members, have been working to develop the necessary framework for a sister co-operative that would have energy efficiency as its core focus. Your input to a short survey will help carry forward this work in an informed and community-oriented way.

PARTNER EVENTS

Anote's Ark Film Screening

A Look at the Everyday Impact of Climate Change

Ecology Ottawa and the Sandy Hill Community Health Centre, along with partner organizations, are coordinating a free film screening of *Anote's Ark*, followed by a panel discussion about climate change. Panelists will speak to their own experience with environmental organizing and strive to connect the struggle of the indigenous people in the film with actions we can take here in Canada.

When: May 9 from 7 to 9 PM.

Where: ByTowne Cinema, 325 Rideau St., Ottawa ([Directions](#))

Cost: Free! Registration via Eventbrite is required.

Green Energy Futures Radio Program

A Canadian Focus on Renewable Energy

With so many discussions about renewable energy currently taking on an American or European perspective, it is exciting to find one with a Canadian point of view. Aired on CKUA Radio Network in Alberta, the latest edition of Green Energy Futures explored Calgary's recent introduction of Property Assessed Clean Energy (PACE) legislation, and what it could mean for home energy retrofits. There are plenty other clips to listen to on a variety of renewable energy topics.
