

Ottawa Renewable Energy Co-Operative, Inc. (OREC) “The Co-op”

Background Information

The following information is for the benefit of Co-op Members and the general public. It is not part of the By-Laws. The By-Laws start on Page 3.

Description

The Ottawa Renewable Energy Co-operative Inc. (OREC) was created to enable individuals to participate in the financing and ownership, of renewable energy generation projects in Eastern Ontario

OREC services its members by enabling them to financially participate in the renewable energy industry, and earn a reasonable return while doing so.

OREC consolidates money from individual residents of Eastern Ontario unable to invest in their own renewable projects, or enable them to participate in projects larger than they could individually. It is intended to participate in projects that generate energy from renewable sources including those that qualify under the parameters of the Feed-in Tariff (FIT and MicroFIT) programs delivered by the Independent Electricity System Operator (IESO) of Ontario .

As a co-operative, we invest in renewable energy projects of various sizes and technologies. In some projects OREC is the sole participant, in other projects OREC acts as joint owner with other parties. Financing from the OREC also provides FIT or MicroFIT contract holders and owners of other renewable energy projects with the opportunity to finance their project with community investment.

OREC works closely with other renewable energy co-operatives in Ontario in the selection of projects, encouraging co-op membership and investment, and maximizing community ownership of renewable power generation.
